ABOUT US

The history of the old Johannesburg gasworks can be traced back more than one hundred years to 1892 when a 30-metre gas pipeline was first installed in President Street to supply lighting. The gasworks were originally managed by the Johannesburg Council's Department of Water and Gas which operated from the suburb of Cottesloe. Gas was produced at the Cottesloe Gasworks from 1952 until 1991, but in 1992 a decision was taken to cease all production at the Cottesloe Gasworks and purchase gas from Sasol Gas instead.

In August 2000, the Greater Johannesburg Metropolitan Council completed the privatisation of Metro Gas, a South African gas distributor. It was sold to Cottesloe Investment Holdings and resulted in the formation of Egoli Gas (Pty) Ltd on 18 August 2000. In 2010, Reatile Group acquired a 25% shareholding in Egoli Gas through Reatile Energy, a wholly-owned subsidiary of Reatile Group. In July 2013 the remaining 75% shareholding in Egoli Gas was acquired by the Reatile Group.

EGOLI GAS TODAY

As a reticulator, Egoli Gas provides natural gas to homes and businesses via underground pipes. We service the Greater Johannesburg metropolitan area, with more than 8,500 customers in domestic, multi-dwelling and central-water-heating precincts, as well as in the hospitality, industrial and power-generation sectors.

Our commitment to an energy-efficient, low-carbon lifestyle ensures that our customers can access an uninterrupted flow of piped natural gas, which is ready to use safely. Our reticulated network is located in many of the well-established Johannesburg suburbs, and in recent years has been extensively expanded into Sandton and Randburg.

NERSA trading licences were obtained in 2013 and 2014 respectively to enable us to trade in Gauteng and KwaZulu-Natal. As Egoli Gas we assumed the role of trader within the Reatile Group in February 2019.

We trade natural gas and methane-rich gas outside of the Egoli Gas reticulated licensed area to large industrial customers. Our trading licences for Gauteng and KwaZulu-Natal have enabled us to develop opportunities on existing 3rd party natural gas pipelines within these regions of South Africa.

COMPANY VISION AND VALUES

“**EGOLI GAS, SOLUTIONS THAT WORK FOR YOU: OUR CUSTOMERS**”

Communication

Giving, receiving and sharing relevant information and knowledge respectfully, honestly, transparently and clearly to ensure understanding

Fairness

Treating everyone with respect by ensuring equality in opportunities, workload distribution, recognition and being fair and unbiased in our actions

Accountability

Taking responsibility and ownership of one's decisions, actions, performance and behaviour, ensuring everyone is focused on achieving excellence and success

Team Work

Understanding, supporting and collaboration of ideas by a diverse group of people, laying down their own individual differences, promoting inclusivity and working as one to achieve a common goal

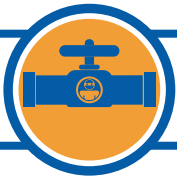

Trust & Integrity

Believing we are all committed to doing what is best for Egoli and our colleagues by doing the right thing, being honest, truthful, respectful and reliable in our intentions, words and actions

Safety

Creating a safe work environment where people are free from psychological, physical and emotional harm by considering the well-being of others and following precautionary measures, safety practices, standards and operating procedures

WHY USE NATURAL GAS?

THE NATURAL ENERGY ALTERNATIVE FOR YOUR FUTURE

Natural gas is a sustainable and efficient source of energy, extracted directly from the earth. It is the cleanest fossil fuel source available. As a more eco-friendly option, it is kinder to the environment and requires far less processing than many other conventional energy sources.

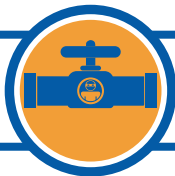

Piped natural gas is cost-effective, instant and safe when used in accordance with prescribed specifications. Because it is lighter than air it dissipates safely into the atmosphere in the event of a leak. Egoli Gas is consistent in quality, clean, affordable, reliable, safe to use gas.

Convenience is at your fingertips with Egoli Gas. We pipe directly to your premises, and are on tap 24/7-365. When you use our gas there is no need for bulky cylinders or storage space with the associated logistics costs. Our customer-focused offering affords you peace of mind and valuable savings.

Piped natural gas has a wide range of domestic uses:

- It heats home environments on cold days.
- It is highly effective for cooking.
- It provides homes with hot water.

WHY USE NATURAL GAS?

The addition of a natural gas generator means that the inconvenience of load-shedding is no longer an issue.

Piped natural gas business uses include steam generation, combined heat and cooling generation, and power generation. It is also used extensively for numerous manufacturing processes.

The wide spectrum of natural gas uses ensures its longevity as a highly efficient and cost-effective energy solution for industrial and manufacturing use.

Egoli Gas reticulates natural gas directly to customers' premises within the Greater Johannesburg area via an established and safe 1,200-kilometre piped natural gas network. Johannesburg is currently the only South African city with reticulated piped natural gas.

Natural gas is piped by Sasol from Mozambique to Secunda via an 864-kilometre pipeline. From Secunda the pressure is reduced and the natural gas is odorised, entering the Gauteng network at Nigel. Methane-rich gas is produced in Secunda. It is then piped to Richards Bay and down to Durban South.

SAFETY POLICY

INTEGRATED APPROACH TOWARDS SAFETY, HEALTH, THE ENVIRONMENT & QUALITY - OPERATIONS EXCELLENCE MANAGEMENT SYSTEM (OEMS)

At Egoli Gas we have launched OEMS, a management system designed to advance our occupational safety and, more especially, our process safety management whilst enhancing our operational reliability, environmental performance and project delivery.

THE 2 MAIN AREAS OF FOCUS ARE:

- THE 12 CARDINAL SAFETY RULES AND
- PROCESS SAFETY MANAGEMENT

**THE ULTIMATE OUTCOME -
A DESIRED "SAFETY CULTURE"**

LIFE SAVING PROTOCOLS

DESIRED SAFETY CULTURE

OPERATIONAL SAFETY MANAGEMENT

A proactive way to ensure that potential hazards are identified and risk assessed to ensure that controls are put in place to prevent unwanted incidents, with the expectation of continuous performance improvements to achieve zero harm.

Egoli Gas (Pty) Ltd is an Associate Member of the International Gas Union as well as a Member of SAGA.

SHAREHOLDING

REATILE GROUP IS A 100% BLACK-OWNED, 30% BLACK WOMEN-OWNED INVESTMENT HOLDING COMPANY AND THE ULTIMATE HOLDING COMPANY OF EGOLI GAS.

SINCE ITS INCORPORATION IN 2003, REATILE GROUP'S INVESTMENT PORTFOLIO CONTINUES TO GROW AND NOW INCLUDES:

- o Egoli Gas - a 100% owned subsidiary of the Reatile Group through its subsidiary called Liquid Mist Trade & Invest 116 (Pty) Ltd

- a 20% equity interest in juwi Solar ZA Construction and 43% equity interest in juwi Solar ZA O&M
- 26% interest in Rubis Asphalt South Africa
- Acquire a 100% interest in Hulisani Limited
- Acquire a 66% interest in Rustmo1 Solar PV
- Acquire a 6.67% interest in Kouga Wind Farm
- Acquire a 2.4% indirect interest held in Avon Peaking Power
- Acquire a 2.4% indirect interest held in Dedisa Peaking Power

DIRECTORS

SIMPHIWE MEHLO MAKULU (CHAIRMAN)

Simphiwe Mehlo Makulu is a qualified engineer, and holds an MBA as well as a post-graduate diploma in marketing. In 2003, together with co-founders, he formed the Reatile Group to invest in the petroleum and energy sectors of the Southern African economy. He holds the position as Executive Chairman and has grown the Reatile Group to a substantial net asset value over a 17-year period.

DIRECTORS

NANGAMSO THANDIWE HILLIE (NON-EXECUTIVE DIRECTOR)

Thandi Hillie has an Honours Degree in Applied Mathematics and began her career in the banking world with stints at Absa and Standard Corporate and Merchant Bank. She has more than 20 years' experience in financial markets. As founder and CEO of Zambezi Capital she has provided financial risk advisory services to both the private and public sector. Since 2016 she has held the position of CEO at Sbhekuza Rail, an operating division of Sbhekuza Women Investments (Pty) Ltd, a 100% Black women-owned and managed company that has been granted a 20-year concession by Transnet SOC Limited to provide freight and passenger rail services along the Mthatha-Amabele branchline.
